

TMC offers a variety of Rocky Mountain Frontier health services

Teton Medical Center is here for you, every day, 365 days a year. We would like to convince you to use TMC for a wide variety of medical services, some of which you might not know we offer:

HOSPITAL SERVICES.

If you have an operation, illness, or injury, you can choose to recover at TMC. We're close to home, and equipped with the professional services you need to mend quickly. Just ask your doctor about your options.

EMERGENCY ROOM.

24-7, 365 days a year, staffed by medical professionals. Ready at any time, to help stabilize and make "next step" decisions.

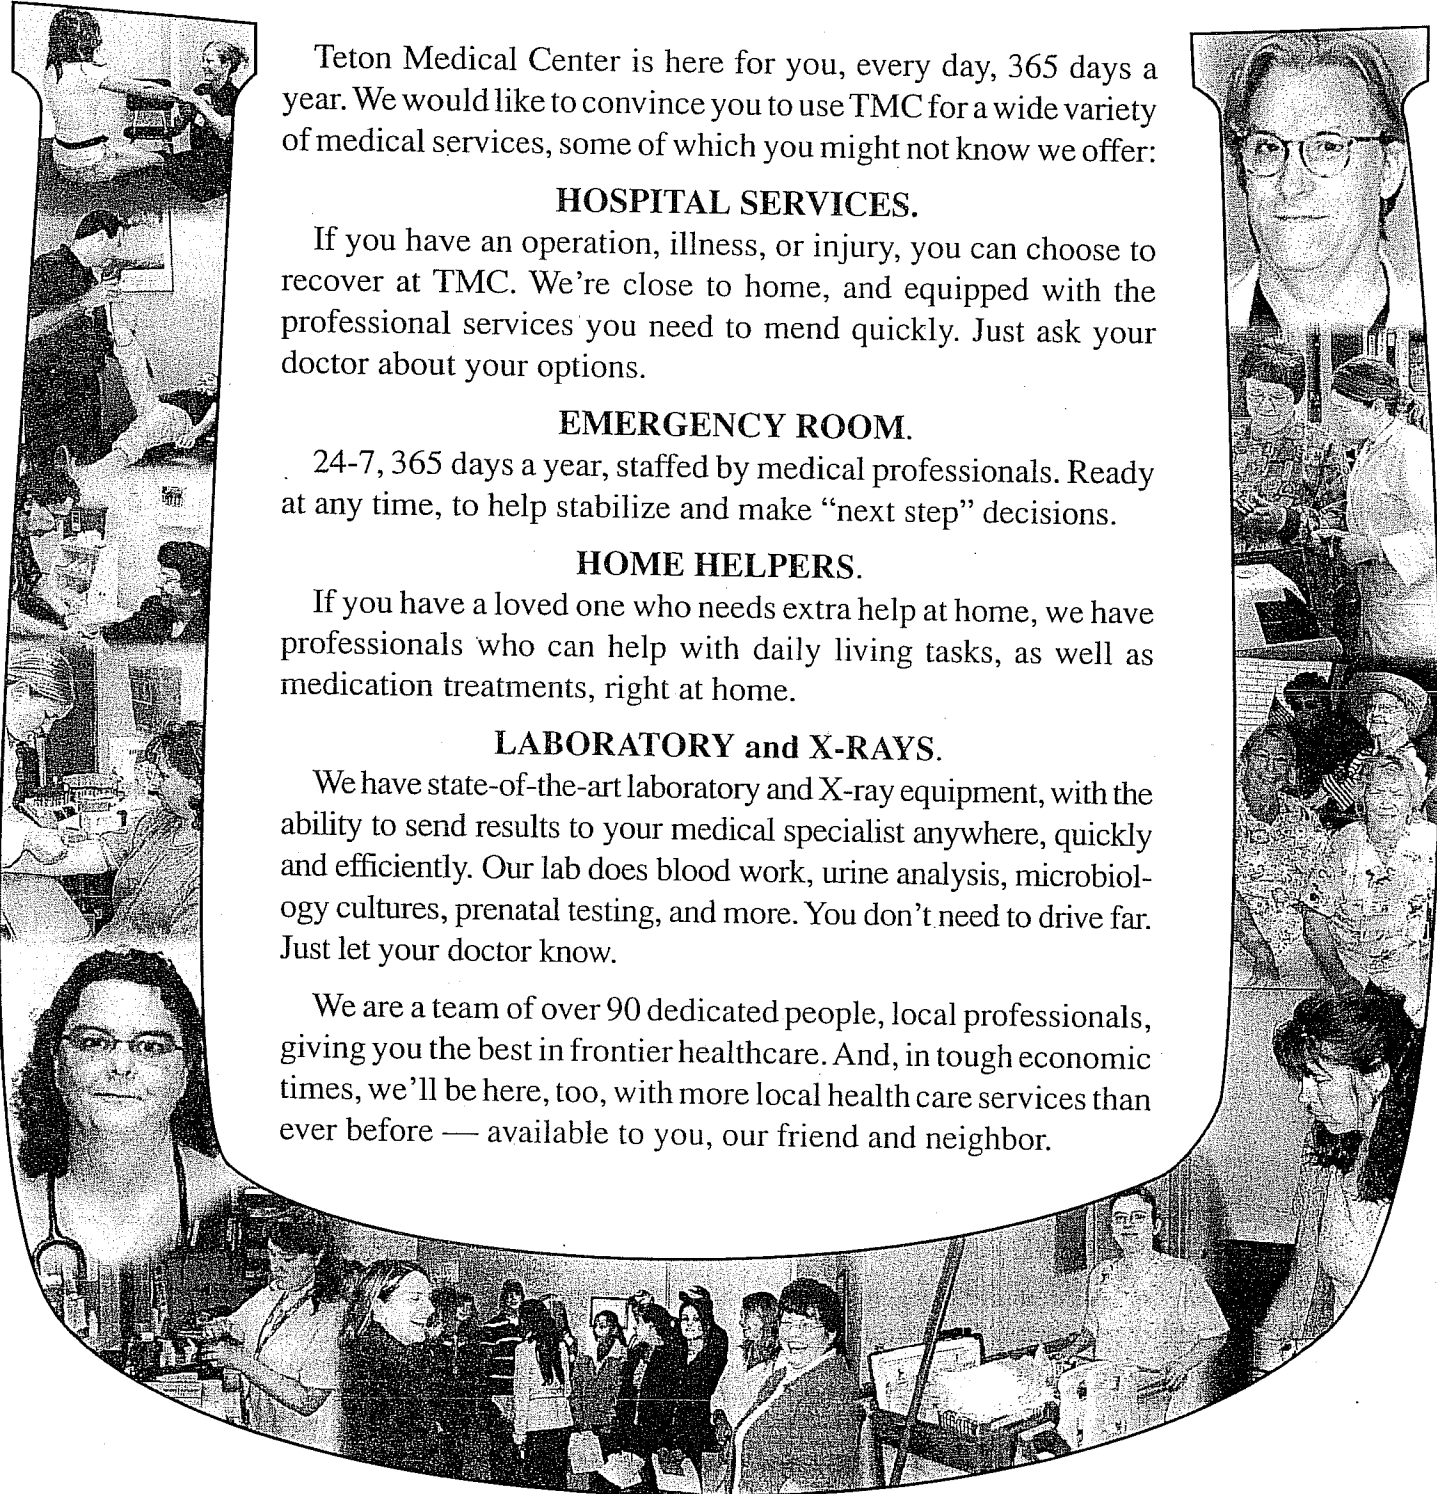

HOME HELPERS.

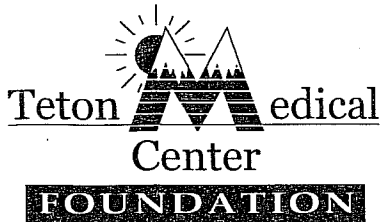

If you have a loved one who needs extra help at home, we have professionals who can help with daily living tasks, as well as medication treatments, right at home.

LABORATORY and X-RAYS.

We have state-of-the-art laboratory and X-ray equipment, with the ability to send results to your medical specialist anywhere, quickly and efficiently. Our lab does blood work, urine analysis, microbiology cultures, prenatal testing, and more. You don't need to drive far. Just let your doctor know.

We are a team of over 90 dedicated people, local professionals, giving you the best in frontier healthcare. And, in tough economic times, we'll be here, too, with more local health care services than ever before — available to you, our friend and neighbor.

Building a Future for Hometown Quality Care

In 1982, Teton Medical Center Foundation was organized for the purpose of "organizing and sustaining long-range gift development." In over 25 years, our goals haven't changed.

The Foundation seeks financial support for Teton Medical Center through grants, individual donations, estate (planned) gifts, and community supported events.
